Forest Dragon Fact Sheet

Nuts and berries grown on the trees.

Squirrels and birds live in the trees.

Dragons live in hollow trees in the forest

Forest Dragons eat birds, squirrels, nuts and berries

Swamp Dragon Fact Sheet

Waterlilies grow in the swamp

Frogs, salamanders and snakes live in the swamp.

Dragons live in hollow logs in the swamp

Swamp Dragons eat amphibians and reptiles that live in the swamp. They lay their eggs in nests on the side of the swamp. They use the swamp to stay cool as they overheat easily.

Meadow Dragon Fact Sheet

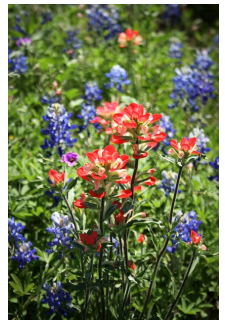

Dragons live in the mountain caves at the top of the meadow. They go back to their caves at night.

Buttercups, daisies and other wild flowers grow in the meadow

Meadow Dragons eat the grass and flowers from the meadow. They lay their eggs in nests made out leaves and sticks. They get their water from the river and bask in the sunshine in the meadow in the daytime

Due to the dragons' large size, the dragons need a large meadow area as they must eat a large amount of grass and flowers every day.
