INSTITUTE FOR IMAGINATIVE INQUIRY
SUMMER WORKSHOP
JULY 28-31 | CHICAGO, IL

As part of the Progressive Education Network's Independent Workshop Series the Institute for Imaginative Inquiry will conduct **a four-day training at Catherine Cook School in Chicago** this summer!

Imaginative Inquiry is a pedagogy that enrolls students as a team of experts who encounter **complex, real-world problems** in an imaginary context. Guided by inquiry and fueled by research, students are immersed in **authentic, place-based learning** that engages not only their **intellectual** capacities, but also their **physical**, **social**, and **emotional** selves. As active participants in a fictional context, students use their skills, knowledge, emotions, and moral instincts to **analyze** situations, **make decisions**, and **understand their impact** on others.

Join us this summer to **experience examples** of Imaginative Inquiry units for **grades K-6** and explore how the conventions, techniques, and philosophy of Imaginative Inquiry strengthen students' **social imagination**, allowing them to **create, reflect, and practice becoming agents of change in our world**!
